### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

- Claim 1, line 4, "than" has been replaced by – an – to correct an obvious typographical error.
- Claim 20, at the end of the claim a period –.– has been inserted.

### **REASONS FOR ALLOWANCE**

2. The following is an examiner's statement of reasons for allowance: the prior art of record do not fairly teach in permissible combination the claimed invention. Applicant's arguments filed 12/15/04 are persuasive for new claim 19. New claims 20 and 24 appear to be similar to previously objected to claims 3 and 9. Claim 24, it should be noted, requires detonation combustion which is well known per se. However, it would not have been obvious to employ with the pulse combustors of either Pon or Marchal, as detonative combustion requires design to accommodate the associated shock waves downstream. The specific features of claim 11 that are not taught by the art of record are the configuration of the combustion chamber conduits. In claim 16, the "first means" paragraph in particular renders the claims distinct from the rotating combustor art (e.g. Call 3,417,564).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
